Strategic Sourcing, Inc.

Your One-Stop Shop for Everything IT

What We Do

Strategic Sourcing, Inc. (SSI) understands that IT professionals need to work as efficiently as possible to meet the demands of their jobs. We make it our goal to help you acquire, deploy, and manage your IT assets in the most efficient and affordable way possible.

Our online storefront gives you access to more than 2,500,000 products from more than 1,500 manufacturers. But SSI does more than just show you which IT products are available — our solution also helps you locate the best price and the closest warehouse to your location. It also simplifies the process of managing standards and controlling expenditures across your healthcare organization. SSI automates recordkeeping by populating serial number, shipping, and invoice data into inventory and deployment modules.

What We Provide

Our industry knowledge, decades of experience, and hands-on consultative approach have helped us develop the most comprehensive IT acquisition and management tool in the industry. Leading organizations use our solution to reduce the labor hours associated with technology solution purchasing, tracking, and managing. The detailed reporting our solution provides can help with reporting required for regulatory compliance and for government reimbursement programs. Regardless of the industry or size of your organization, SSI can quickly generate a valuable ROI.

Features

- View product features side-by-side with the product comparison feature
- The store catalog provides a simplified ordering process
- Administrators can require purchase approval to control expenses
- Order confirmation to assure you your order has been received and processed
- Receive next-day, advance ship notice that includes your purchase order number, product number, quantity, serial number, and shipping and tracking information
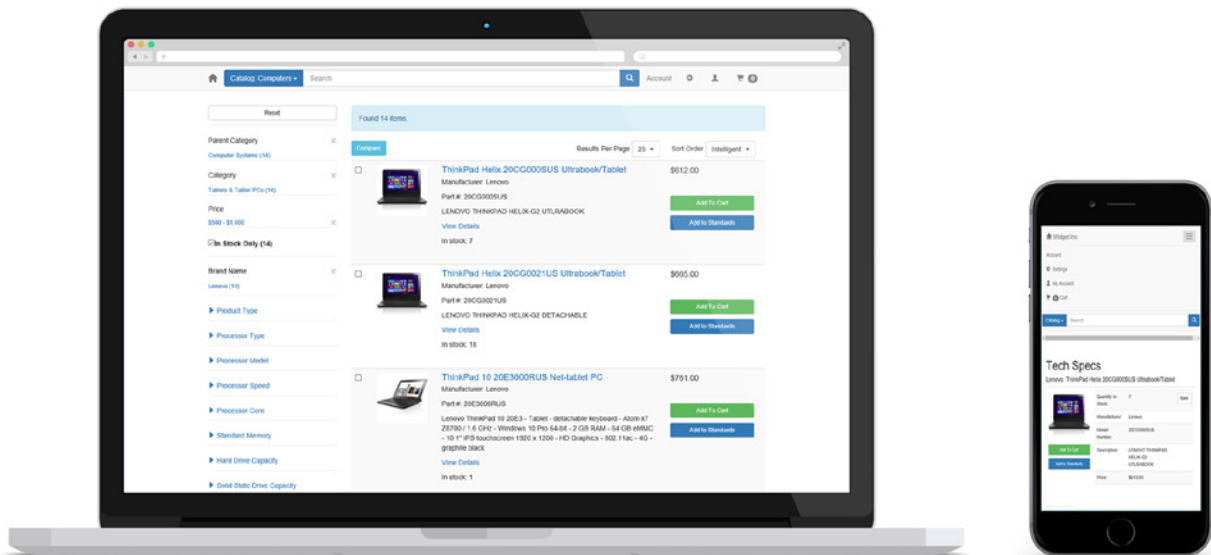

What Makes Our Solution Unique

- **IT asset lifecycle solution:** Everything you need to manage IT assets is all in a single platform. Our software allows you to do it all: pricing, orders, purchasing, order tracking, deployment, and managing.

- **Customizable catalogs:** Catalogs can be customized to show just the products that your organization needs.

- **Custom report engine:** Gain real-time visibility over your assets through fully customizable reports.

- **Searchable purchase history:** Our solution gives you the ability to find product details, purchase dates, quantities, and costs, as well as images of previous purchase orders.

# Integrated Asset Management System

SSI offers customers access to a full suite of asset management tools. Our asset management is the most cost-effective suite in the industry and can be used to manage your assets throughout the product lifecycle.

- Asset information automatically loaded at the time of shipment

- Non-SSI product details easily added as needed

- Scanner-based inventory module

- Inventory and activity reports

- Scanner-based deployment module

- Automatic inventory updates

- Multiple deployment options

- Deployment relocation and asset retirement reports

- Warranty, service, time in production, and asset location tracking
